

ROADMAP

Even though VisionPoint is the most simple and effective tool to support your performance management, we know that it takes more than a great tool to be successful. Material and process needs to be the best as well, and that's why we have developed the VisionPoint Roadmap which will take your organization through the steps of preparing a successful implementation of VisionPoint.

SAFE HARBOUR

We know that in order to have success with performance management – and most other things – material, tools and process must be of the highest quality.

We have the tool – VisionPoint – and now we have developed a complete process you can use to prepare your foundation for a safe and quick implementation.

Do we need to say that –again- we have focused on simplicity and efficiency?

Hardly, but read on and experience how simple it can be to implement a strong performance management solution which will be a real driver for improvements in your business.

WHAT IS VISIONPOINT ROADMAP?

The VisionPoint Roadmap is a description of the individual steps which are typical in a strategy development process.

Do we need to say that – again - we have focused on simplicity and efficiency?

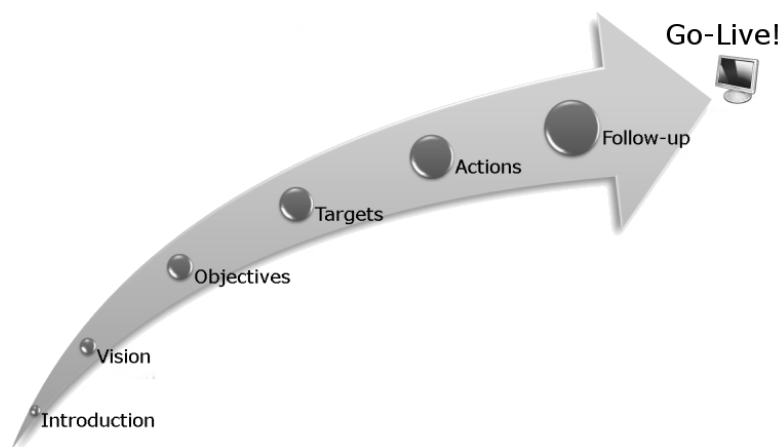

Together with the description of each step we have created a number of templates which you can use to describe the results of each step.

The content of the templates are designed to match the VisionPoint structure to ensure that when you are ready to Go live you have all the needed information in place.

ALL THE WAY

VisionPoint Roadmap will guide your organization safely through the implementation of VisionPoint from the articulation of vision, strategy and KPI's to description of action plans. VisionPoint roadmap is the secure way to make your organization ready to take full advantage of VisionPoint.

We have put a lot of effort into the description of a secure way to complete the steps it takes to prepare a vision statement, strategy and KPI's.

If you already have some or all of the components you can still benefit from the VisionPoint roadmap by using it as a checklist for your implementation

THE STEPS

VisionPoint Roadmap is a complete process divided into steps with guidance on how to facilitate each step, combined with ready-to-use templates.

The templates are used to describe the results of each step and they are designed so they can be used directly in the workshops with the organizations and also later on as the foundation for creating the VisionPoint master data.

ALL THE WAY

The process includes all relevant steps in a strategy process, from vision statement and strategic objectives to specific KPI's and action plans.

In the last step, which we call Go-Live, we have described in detail how you transfer your plans and goals to useful and correct master data in VisionPoint.

And we mean detail... we have even mapped the content of the templates you have been using in the individual steps directly to menu items and forms in VisionPoint.

If your organization has already been through the process and prepared all relevant content it might still be a good idea to

have a look at VisionPoint Roadmap to be inspired on how to transform your paper based material into an efficient setup in VisionPoint – in no time!

If you have already created some, but not all, of the elements you can still use the description and templates of selected steps in VisionPoint Roadmap – you decide what you find useful.

USE YOUR PARTNER

Your VisionPoint implementation partner has full access to the content of VisionPoint Roadmap which can be made available to your organization.

Often, your implementation partner will also be able to offer you additional guidance in the strategy process and implementation of VisionPoint.

TELL ME MORE

You can request more information at your VisionPoint implementation partner or you can contact BusinessPoint and get answers to your questions or we can help you with a contact to a VisionPoint implementation partner with specific knowledge about your industry.
